

EDGE PROTECTORS

Product Description

The edge protector is a definite essential when you ship products that needs extra protection. The edge protector is designed specially to protect the edges of goods that a being shipped, especially when the goods are being strapped.

Edge Protector "Jumbo"

This edge protectors are specifically developed for the paper industry and reusable. The fillet of the edge protection is designed to protect the edge of the paper jumbo rolls. The unique design, ensures that the pressure point is and stays in a optimise position.

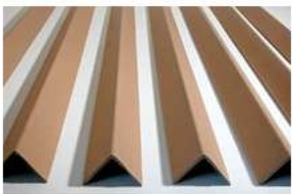

Applications: Designed for high preload forces in paper rolls, cases, steel.

Edge Protector KS 90 P

This simple edge protector offers a very economic cargo protection and it is especially developed to protect cartons and pallets. The unique design ensures that the pressure point is and stays in a optimise position. A very economic, easy reusable solution.

Applications: Cartons - Cases - Pallets

Card Board (Paper) Edge Protector

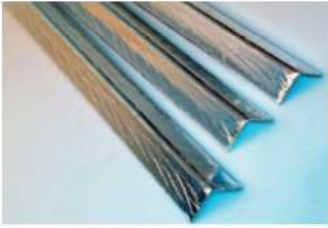

Edge protector or corner board is manufactured from recycled craft paper layers, laminated with glue. The use of strapping helps to stabilize your load but can possibly cause crushing damage at the corners. Corner boards allow you to create a buffer between the load and the strapping, so that the strapping can be tightened without causing damage.

Industries Served

- Logistics
- Engineering and Machinery
- Power and Refinery

Water Rejecting Card Board Edge Protector

Water resistance edge protector are outside wrapped in aluminium foil paper for water rejection and widely used in the refrigerators conditions. These water resistance edge protector used for wrapping cartons and for pallet wrapping when stored in refrigerators or very moist areas during shipping. Widely used in the package of the fruit and goods when exporting in the refrigerator containers.

Key Features

- Replaces expensive packaging material
- Cost-saving in labour and materials
- Environmentally-Friendly
- Extra treatment not required, such as fumigation for wooden material
- Optimisation of transport space by double-stacking
- Strengthens packaging and minimises transport damage

Product Specifications

Edge Protector "Jumbo"

Technical Specifications		
Dimensions	P.p. Carton	Carton/Pallet
140 x 190 x 150 mm	54	20
