

EASY-CUT 1500 SERIES

Product Description

Product damage is a persistent issue faced by warehouses and retailers; and commonly, the problem lies in the box/strap cutter. The Easy-Cut range is specially designed to protect your product from damage, ensure the safety of users while opening cardboard boxes and cutting composite straps. Easy-Cut's industrial German-made blade and sturdy handle makes it more durable than other cutters.

Easy-Cut 1500 Elite offers a single precise blade depth setting that allows anyone, regardless of experience or skill level, to cut a box open with confidence knowing the product inside will remain intact! Not to be confused with an Auto-Retract safety knife, this safety knife offers a spring-blade retraction system that automatically retracts the blade inside the unit when the handle is released.

The Easy-Cut 1500 is the choice of knife for retailers and distribution to eliminate the multi blade depth settings offered on other Easy-Cut safety knives. This feature of offering only one single blade depth takes away the additional depths that a new stocking associate typically resorts to, preventing product damage!

The snap-on holster and lanyard system rotates 180-degrees, ensuring easy reach and secure placement on a belt loop. This feature reduces injury and downtime looking for lost cutters. A convenient dual-sided edge guide enables both left and right-handed users to make quick, accurate top cuts and slides back into locked position when the cut is complete.

Key Features

- Ambidextrous edge-guide
- Back-up blade storage
- Ergonomic handle
- Precise single blade setting
