

Product Description

Thermax Temperature Indicator Strips are simple temperature monitoring systems. These strips are self-adhesive labels that has multiple alarm indicators that changes from silver to black individually as temperature rises above specific values. Each alarm indicator is triggered at a different temperature level, to provide better data of the temperature during shipping.

These strips provide immediate responses and are resistant to oil, water and steam. The colour change is non-reversible, preventing tampering, and giving shippers and handlers visual evidence of temperature breaches.

For industries like pharmaceuticals and food stuffs, the strips help to prevent heat-related deterioration. During the transportation and distribution, it will provide a visual indication when the thermal disinfection temperature has been reached.

For manufacturing industries such as electronics, aerospace and automotive, the thermax strip helps to monitor temperature surface which ensures that soldering temperatures have been achieved. Thermax strips also provide visual indication for overheating of machinery and insure that temperature sensitive products meet installation requirements.

Industries Served

- Aerospace
- Food
- Electronics
- Engineering
- Healthcare
- Logistics
- Pharmaceutical
- Research

Key Features

- Compact design for use on small areas
- Excellent accuracy to +/- 2% of the Fahrenheit rating
- Permanent record for inspection and quality control
- Calibration-free
- Oil, water and steam resistant
- Irreversible labels
- Inexpensive and easy to use
- Immediate response
- Temperature range 29 - 290°C
- Silver to black colour change
