

EXHAUST & CONNECTION PORTS

Product Description

Exhaust and Connection ports are ideal for large container applications where air drying equipment has to be connected to items such as satellite containers.

The two models available are Manual Relief Valve (Exhaust port) and Self Sealing Valve (Connection port).

Industries Served

- Apparel And Accessory Packaging
- Electronics
- Food And Beverage
- Healthcare
- Personal Products
- Pharmaceuticals

Manual Relief Valve

Featuring a manual override button to open the port, the Manual Relief Valve is an exhaust port that can be used as an inlet connection on containers. The self-sealing valve allows air to enter the container but prevent air from flowing out.

Self Sealing Valve

This unit is a connection port that can be used as an inlet connection on containers. Its self-sealing feature allows air to enter the container but not flow out.
