

FREE STANDING DESICCATORS

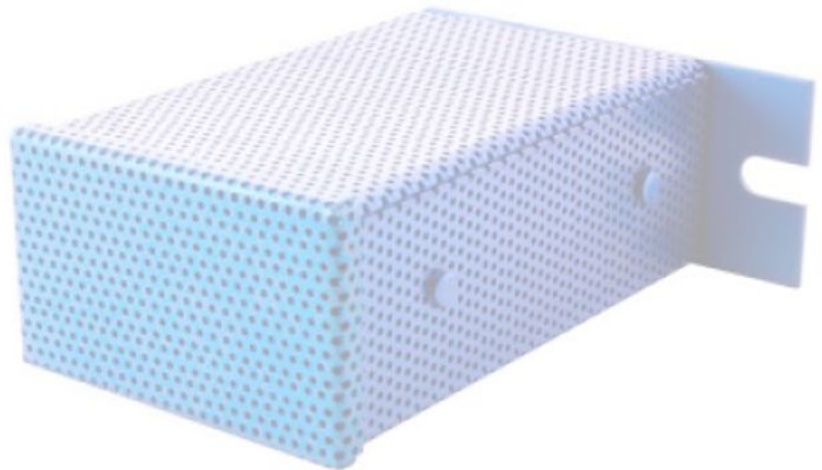

Product Description

Free Standing Desiccators are used to protect electrical and optical equipment against corrosion, dampness, and contamination. To monitor its moisture saturation, the desiccators can be paired with a desiccant (either silica gel or molecular sieve) or humidity indicator card. When the indicators turn from blue to pink, users will have to replace the desiccant or humidity indicator card.

Molecular sieve is highly recommended for applications where the equipment may be subjected to immediate failure due to water vapour condensation. The desiccant will maintain an ultra low relative humidity for very sensitive equipment or enclosures that operates at low temperatures.

Industries Served

- Apparel And Accessory Packaging
- Electronics
- Healthcare
- Personal Products
- Pharmaceuticals

STREAM PEAK INTERNATIONAL PTE LTD

Valuing Relationships, Protecting Goods
Address: 26 Tuas South Street 3, S(638026)
Website: www.streampeak.com.sg

Key Features

- Electronics
- Electrical equipment
- Telecommunications equipment
- Computer equipment
- Electro-optical equipment
- Optical equipment

Product Specifications

Free Standing Desiccators are available in the following forms:

- Molecular Sieve Desiccant Box
- 10g Indicating Silica Gel Container
- 15g Indicating Silica Gel Container
- Silica Gel Pylon
- Molecular Sieve Filled Dehumidifier Unit (Long)
- 3g Molecular Sieve and Silica Gel Filled Unit
- 2g Molecular Sieve Unit
