

# HYDROCARBON ADSORPTION UNIT

## Product Description

Filled with activated carbon, the hydrocarbon adsorption units adsorb hydrocarbon vapours, aviation fuel vapours, and other contaminants.

This desiccator is commonly used on airborne applications where the equipment may attract contaminants while the aircraft is on the ground.

## Industries Served

- Electronics
- Healthcare
- Personal Products
- Pharmaceuticals

## Key Features

- Adsorbs hydrocarbon vapours
- Prevent contaminants from entering equipment

## Product Specifications

Hydrocarbon Adsorption Units are available in the following models:

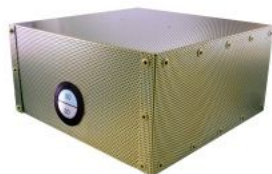

- Metric Thread 6 & 8g Activated Carbon Unit
- 10g - 22g Combined Molecular Sieve & Carbon Ultra Clean Units
- Metric Thread & R.F. Screened 8g Activated Carbon Unit
- 6g Activated Carbon Unit
