

PURGE RELIEF VALVE

Product Description

UNF Purging Valve offers a tire valve core in lightweight minimum-length housing that can be used either to purge or pressurised containers.

To activate the valve, an air chuck is required (which is not provided by Stream Peak). The cap may be secured using user-provided safety wire to attach it to the body.

Industries Served

- Apparel And Accessory Packaging
- Electronics
- Food And Beverage
- Healthcare
- Personal Products
