

STRETCH WRAPPING MACHINE

Product Description

Stream Peak's Stretch Wrapping Machine is an automatic pallet stretch wrapper that wraps your pallet load safely and securely to ensure smooth delivery. The machine is able to provide a uniform way of wrapping the pallets as compared to manual-wrap stretch films. This would give the wrapping a clean, neat and professional look.

Using an automatic wrapping machine increases the efficiency of the pallet wrapping process for your company. It also reduces film cost while ensuring that your product is safe and secure for delivery.

Featuring an automatic height sensor that detects the height of your pallet, the machine will adjust the wrapping height accordingly. It also allows for manual configurations such as being able to influence the number of rounds of stretch film required around the pallet. Simply turn the knob and let the machine do the rest.

The machine also has a soft start cycle function for light loaded pallets, preventing them from toppling over.

Industries Served

- Aerospace
- Defense
- Electronics
- Engineering and Machinery
- Food
- Logistic
- Pharmaceutical
- Power and Refinery
- Retail

Key Features

- Precise phase stopping at cycle end
- Photocell to read pallet height
- Soft start and stop
- Variable turntable speed
- Screen control

Additional Features

- Ramp
- Press unit
- Turntable diameter
- Pallet height

Product Specification

| Technical Specifications | |
|-----------------------------|----------------------|
| Control System: | PLC + Screen Control |
| Diameter of Turntable: | 1500 mm |
| Max pallet height: | 2100 mm |
| Max pallet weight: | 1500 kg |
| Film reel inside diameter: | 75 mm |
| Film reel outside diameter: | 250 mm |
| Turntable speed: | 1-10 cycles / minute |
| Turntable height: | 80 mm |
| Turntable motor: | 0.75 kw |
| Film-rack lift motor: | 0.18 kw |
| Power supply: | 20V 50HZ 1 Phase |
